

With a century of experience, George T. Hall (GTH) brings experience and intuition to automation challenges and creates sustainable, reliable control solutions. We'll work within the framework of your existing technology to modernize operations or design new solutions when you're looking to expand. We know the components, have longstanding relationships with hardware providers, and truly enjoy our work and our clients.

## AUTOMATION SOLUTIONS FOR GREATER PRODUCT QUALITY AND SYSTEM EFFICIENCY

### APPLICATIONS WE SERVE

**MACHINE CONTROL**

**THERMAL PROCESSES**

**DATA ANALYTICS**

### FOOD AND BEVERAGE EXPERTISE

GTH has been providing instrumentation and control solutions to this market for nearly 90 years. We specialize in automation, on-site programming support, instrument calibrations, and UL control panel modernization. Our engineers are also trained in ISA and FDA standards as they apply to these applications.

### PLC MODERNIZATION

Our upgrade and migration solutions allow you to upgrade while preserving your maximum hardware and software investment. We are proficient in full scale software conversions, factory acceptance testing, and commissioning so you can be certain the modernization will be completed in a timely manner, with minimum downtime.

### SYSTEM PROCESS DESIGN

With our technical expertise and two UL 508A panel shops, we have teamed with a number of original equipment manufacturers (OEMs) to create new systems for custom applications. We understand that food & beverage processes are as unique as the products being manufactured and with decades of control & software expertise our engineers can put to work on new system design and retrofits allowing you to upgrade an existing process, update your instrumentation, customize a software system, or build an entirely new production line.

### DATA ACQUISITION AND SCADA

Modern software allows for increased remote access capabilities and reporting, so your data is both visible and usable in real-time. Our engineers are experts in modernizing systems to improve efficiency and provide greater data visibility with Asset Performance Management (APM), users are able to monitor system performance, access predictive maintenance, and track reliability across the facility.

GTH brings value to our clients by utilizing our expertise in automation and control solutions to improve performance, reduce waste, and provide valuable data while establishing successful partnerships throughout the lifecycle of our projects. Our culture is one of continuous improvement, to benefit our employees and customers.

**GTH was founded in 1932 by George Hall. When he started the company, he often referred to it as “the house that service built”. We work each day to live up to his legacy of customer service, technical support, and continuous improvement. Being awarded 2023 System Integrator of the Year affirms our commitment to our legacy and our future as one of the leading System Integrators for the Western Region.**

## SERVING THE WESTERN US

**“ Our solutions are intricately designed to handle the terrain of our region and the specifics of your business -- but straightforward to operate so you can move ahead quickly.”**

## PARTNERSHIPS

With George T. Hall, there’s a century of expertise built into every solution. That’s decades upon decades of watching industry trends, building relationships with technology providers, and knowing the intricacies of every single hardware component and each line of code so that what we deliver is exactly what your organization needs.
