

With a century of experience, George T. Hall (GTH) brings experience and intuition to automation challenges and creates sustainable, reliable control solutions. We'll work within the framework of your existing technology to modernize operations or design new solutions when you're looking to expand. We know the components, have longstanding relationships with hardware providers, and truly enjoy our work and our clients.

**CONTROL AND AUTOMATION
SOLUTIONS TO ENHANCE
PRODUCTION SAFETY, SPEED,
AND QUALITY**

APPLICATIONS WE SERVE

**PHARMACEUTICAL PROCESS
CONTROL**

MEDICAL DEVICE MANUFACTURING

**AUTOMATED PLANT UTILITY
SYSTEMS**

PHARMACEUTICAL AND LIFE SCIENCES

To ensure the quality and safety of medications, vaccines, and a variety of life-saving medical devices and critical personal health products, pharmaceutical and medical device production facilities face some of the toughest regulations of any type of manufacturer. We do this by developing control and automation solutions that enable lean and rapid production and integrating facility-wide PLC and SCADA solutions that enable reliability, repeatability, and traceability.

UL CONTROL PANEL DEVELOPMENT

As a full-service control panel provider, we design, engineer, assemble, wire, quality test, and start-up your panel to meet your exact specifications. At our two UL certified panel shops, we use only the highest quality UL listed components to ensure your system is designed to operate reliably across its anticipated lifetime. We also offer comprehensive field startup services that consist of extensive system documentation, onsite I/O and loop checks, and thorough final start-up testing.

PLC & SCADA PROGRAMMING AND INTEGRATION

From implementing new production lines, to modernizing decades old operations, we have unmatched experience developing purpose-built, modern PLC and SCADA solutions for a variety of medical device and pharmaceutical production operations.

INSTRUMENT CALIBRATION AND REPAIR

Our field technicians and engineers will keep your systems running efficiently and reduce costly downtime through our wide range of onsite and in-house industrial services. For starters, we offer reliable calibration services using NIST-traceable instruments for gas, temperature, pressure, and level calibrations. When performing calibration services, we comply with industry best practices and utilize ISA data sheets when required.

GTH brings value to our clients by utilizing our expertise in automation and control solutions to improve performance, reduce waste, and provide valuable data while establishing successful partnerships throughout the lifecycle of our projects. Our culture is one of continuous improvement, to benefit our employees and customers.

GTH was founded in 1932 by George Hall. When he started the company, he often referred to it as “the house that service built”. We work each day to live up to his legacy of customer service, technical support, and continuous improvement. Being awarded 2023 System Integrator of the Year affirms our commitment to our legacy and our future as one of the leading System Integrators for the Western Region.

SERVING THE WESTERN US

“Our solutions are intricately designed to handle the terrain of our region and the specifics of your business -- but straightforward to operate so you can move ahead quickly.”

PARTNERSHIPS

With George T. Hall, there’s a century of expertise built into every solution. That’s decades upon decades of watching industry trends, building relationships with technology providers, and knowing the intricacies of every single hardware component and each line of code so that what we deliver is exactly what your organization needs.
